### Sustainable toy street fun for your child's room!

The 44-piece set includes road sections, curves and intersections that can be combined over and over again, as well as a large workshop in a timeless retro design. Children can give free rein to their creativity.

The long-lasting toy roads are easy to connect with each other and offer combination possibilities with other toys. Further add-on and expansion sets from *MyRoads* ensure lasting play fun. The material used is engineered wood from recycled wood from responsible sources.

Note: The *starter set* is designed for a road up to 7 meters long. For those looking for a circuit, we recommend the *MyRoads - Racing Track*. Natural products made of wood may show signs of wear and minor color variations.
